CAPABILITIES STATEMENT

MEET JJR SOLUTIONS

We're a management consulting and technology solutions company dedicated to delivering transformational solutions that advance the nation's health, well-being, and security.

EXPERIENCE VELOCITY

We empower you for rapid mission success through our three-point Velocity approach:

1. **STREAMLINED ACQUISITION**
   Our Sole-Source Phase III Small Business Innovation Research (SBIR) vehicle:

   - Slashes your acquisition time by two-thirds.
   - Gives you a flexible contracting approach.
   - Provides a wide scope of services.

   The SBIR is FAR 6.302(5)-authorized and available Federal-wide.

2. **HUMAN-CENTERED DESIGN**
   You'll see improved solution adoption because we keep people at the center of the solution design and deployment process in a unique fusion of Human-Centered Design (HCD) and Organizational Change Management (OCM) techniques.

3. **TOTAL EXPERIENCE STRATEGY**
   We help you create superior customer and employee experiences, align stakeholders, and achieve improvements through our human-centered Magnify© methodology.

GET BETTER RESULTS

Our human-centered approach to our three service areas (Engage, Enable, Enhance) helps you empower your digital-first workforce; see measurable improvements to customer, employee, and user experiences; and better engage your stakeholders through real-time insights.

ENGAGE: Engaging people at the intersection of people, process, and technology with HCD, Total Experience, and OCM

ENABLE: Enabling secure, cloud-based process automation, real-time analytics, and data management with low-code solutions

ENHANCE: Enhancing our customers' ability to achieve impact at scale through rigorous program management and process improvement

JJRSOLUTIONS.COM

ACCOMPLISH YOUR MISSION

Check out a few examples of how our service areas and capabilities have delivered digital transformation and revolutionized processes to the U.S. Air Force (AF), U.S. Space Force (USSF), Social Security Administration (SSA), and U.S. Department of Veterans Affairs (VA).

ENGAGE

Employee Experience

Our team is modernizing the Veterans Crisis Line to improve its technical ability to serve our Veterans and their loved ones in crisis. We're making it more reliable and technologically scalable, with an improved Veteran and employee experience.

Total Experience (TX)

We helped enable a faster and smoother total experience for SSA employees and customers through TX best practices and governance methods, like service channel improvement and cross-functional teaming.

Digital Workforce Management

AF clients who are spread out geographically stay efficient and mission-focused through our customizable Digital Workforce Capabilities Suite. Designed through User Experience techniques that keep the remote worker's needs in mind, the capabilities enhance collaboration and communication so workers have an improved employee experience and can focus time and energy on their mission.

ENABLE

Suicide Prevention Data Support

We help keep Veterans safe by maintaining and enhancing the VA Clinical Decision Framework Dashboard around Veteran suicide, ensuring it operates seamlessly for VA.

> "Can't overstate the amazing work they have done. Their forward thinking is invaluable. … The JJR Team has been able to optimize our tools and processes."
>
> —U.S. Air Force Client

Space Situational Awareness

We supported improved space domain awareness for USSF by helping to formulate and implement a Data Strategy that drove enterprise-wide data discovery, access, and sharing in an Enterprise Data Management (EDM) approach.

Enterprise Software Assessment

We push to keep U.S. stealth technologies ahead of those of our adversaries by executing an Agile, best-practice approach to software assessment, development, and testing for the AF.

ENHANCE

Rapid Fielding (Section 804)

Leveraging our Section 804 and Other Transaction Authority (OTA) expertise, our AF client successfully executed aircraft experimentation and rapid fielding acquisition strategies.

Facilities and Infrastructure Process Improvement

We helped streamline our AF client's facilities and infrastructure program by analyzing construction contract data, assessing existing workflows and processes, and developing a roadmap to efficiency.

Merit Review Support Services

Because VA must award >$2B to Veteran health research projects annually, we maximized their efficiency by moving them to a cloud-based merit review system and helping them standardize their processes, metrics, and reporting.
